POVERTY = SACRIFICES

WORLDWIDE 1 IN 7 CHILDREN LIVE IN POVERTY

Count how many students are in your class? Now imagine that your class represents all the people of the world. Now do the following calculations ...

Your class will stand up and call out the numbers 1 through 5. Repeat until everyone has a number. Ask everyone to sit down but the number ones are to remain standing. That will show you what 1 in 3 looks like. Do the same with 1 in 5, 1 in 7, 1 in 8, and 1 in 10. So no one is offended or bullied, randomly change the number group each time who will remain standing.

Worldwide	In your class
1 in 7 children live in conditions of poverty.	That's how many? _____
1 in 7 of those using shelters are children.	That's how many? _____
1 in 8 households struggle to put food on the table.	That's how many? _____
1 in 10 cannot afford prescription medications.	That's how many? _____

NOW LET'S MAKE THIS MORE PERSONAL FOR YOU.

What if your family had to live on less money?

1. What would you have to do differently? _____

_____

_____
