

Education:

Accomplishments

1.

All sponsored children drawn from poor families who were either struggling to go to school or idling at home due to lack of school

Fees are now enrolled in schools and are doing well

2. A total of 42 children sat for the Certificate of Primary Education Examination and they all qualified to join secondary level. The number of children joining universities and middle level Colleges increased from 26 to 35.
3. Provided better classrooms in the schools with poor facilities especially where our sponsored children are learning

Goals

1. To provide education for all children for a secure future and a stable life.
2. To develop the children to become active member of the society who will participate in the ongoing changes and developments.

Health & Hygiene:

Accomplishments

1. Health services have been taken to over 1200 patients through mobile clinics.
2. We have reduced malaria prevalence in the area of coverage due to use of nets and safe preventive measures as taught by social workers and the mobile clinic team.
3. Reduced water borne diseases such as typhoid and amoeba through treatment as a result of emphasis made in circle groups on the importance of washing hands before handling food and after visiting the toilet.
4. Reduced Skin diseases especially in children by deworming and treatment

Goals

- i. We envision having a community free from common diseases and ailments especially waterborne diseases.
- ii. To ensure each home has at least have a simple pit latrine

Nutrition:

Accomplishments

1. Through the Chalice children funds we have managed to support six schools to run feeding programs for school going children. Over 800 hundred children are benefiting.
2. Our sponsored families have access to milk from their own goats thus improving proteins in children which help in child growth
3. Improved immunity among young children due to emphasis given to young parents through exclusive Breast feeding for the first 6 months after birth

Goals

- i. To develop a community free from nutrient deficiency diseases
- ii. To raise healthy babies with strong immunity.

Family/Community:

Accomplishments

1. Reached out to 600 families both sponsored and non-sponsored who faced hunger by providing relief food under the East Africa Drought relief funds,
2. Improved on rain water harvesting and water storage capacity. So far at Ukasini village we harvest and store 40000 liters of water. The water supports 280 household who could otherwise walk 10kms to fetch water. The water resource is managed well by one circle group.
3. Due to the effects of climate change, our circle groups have diversified ways of generating income and providing for their families. Small cooperatives have been established where circle groups keep and market goat together. In this way they are able to determine better market prices for the animals.

Goals

- i. To strengthen producer and marketing cooperatives for better prices of the farmer produce
- ii. To strengthen community ownership and better management of the natural resources – such as water and forests

Direct family funding/Circle groups:

Accomplishments

1. *Bringing 480 sponsored families both men and women into the financial mainstream as they access bank accounts, find it easy to save and plan financially for the future*
2. well managed faith circles that provide circle members an avenue for saving and accessing small credits
3. Self-employment for circle members engaged in small enterprises of generating income

Goals

- i. To Improve gender equity by providing equal opportunities, rights and responsibilities for women and men.
- ii. To Improve livelihoods through development of employment opportunities and income generation
